

Alex Vohs

Senior Software Engineer | Full-Stack; Cloud Platform, Data & Integrations

Washington, DC • 202-277-2368 • avohs24@gmail.com • [linkedin.com/in/alex-vohs](https://www.linkedin.com/in/alex-vohs) • github.com/avohs24

Senior software engineer with **7+ years** building scalable, cloud-native applications that serve **millions of users daily**. Built CNN Underscored's commerce platform across TypeScript APIs, Python Lambdas, and Go edge services on AWS and Fastly, contributing to **double-digit YoY revenue growth**. Mentor junior engineers and own production reliability and observability. **Winner of Warner Bros. Discovery Flash Forward: AI/ML Hackathon 2025. AWS Certified Developer.**

PROFESSIONAL EXPERIENCE

CNN (Warner Bros. Discovery)

Senior Software Engineer

Dec. 2025 - Present

- Lead development of **ML-powered product discovery engine**, real-time pricing history, and editorial workflows on Fastly edge services to improve page performance, SEO and user engagement.
- Own CNN Underscored's **commerce API** (a TypeScript/Node microservice on PostgreSQL/AWS), which powers all Underscored content that generates **\$3M/month (~\$36M+/year) in affiliate revenue**; added DynamoDB-backed CTR ranking and affiliate link generation.
- Built an **event-driven, AWS-native ML pipeline (EventBridge → SQS → Lambda)** that streams product and article events to a machine-learning service and persists generated product summaries, tagging, and classification.
- Mentor junior engineers in programming best practices, improving code quality and knowledge sharing.

Full-Stack Software Engineer II

Nov. 2021 - Dec. 2025

- Built **Go Fastly Compute@Edge services** for Product Search and Price Tracker (Terraform, CI/CD, DataDog), enabling low-latency product discovery and price comparison at the CDN edge.
- Designed a **centralized product catalog (~60k products)** and a real-time analytics system that contributed to **double-digit YoY revenue growth**.
- Refactored the API deployment pipeline, **cutting CI/CD time from ~1 hour to 15 minutes**.
- Designed and shipped the **External Feed Ingest Subscriber (Python Lambda)** and refactored Underscored's Lambda architecture, automating external content ingestion.
- Led end-to-end delivery of full-stack features focused on automating bottlenecks in editorial workflow.
- Partnered with Product, Design, and Leadership to own features from team roadmap through to deployment.

Appian

Software Engineer

June 2021 - Nov. 2021

- Built and maintained internal applications integrating third-party partner APIs (Google AI, HR, and finance systems).
- Led creation of a centralized marketing knowledge base that improved cross-team documentation workflows.

WireWheel

Full-Stack Developer (Feb. 2019 - May 2021) • Support Engineer (June 2018 - Feb. 2019)

June 2018 - May 2021

- Built individualized customer reports and resolved issues through data analysis and direct communication, raising satisfaction and **cutting support requests by 30%**.
- Built a secure, **event-driven identity verification service** using AWS SNS; patched penetration-test vulnerabilities, improving trust and compliance.

Grunfeld, Desiderio, Lebowitz, Silverman & Klestadt LLP

Paralegal

May 2016 - June 2018

- Conducted legal research, drafted briefs, and supported International Trade Commission cases.
- Developed strong communication, analytical and documentation skills prior to transitioning into engineering.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, Go, SQL

Frameworks: Node.js/Express, React, Next.js, Vue

Data & Messaging: PostgreSQL, DynamoDB, MongoDB, MySQL, Snowflake; AWS SNS, SQS, EventBridge (event-driven/fan-out)

Cloud & Infrastructure: AWS (Lambda, SNS, SQS, S3, DynamoDB, CloudFormation), Terraform, Docker, Fastly Compute@Edge

Observability & Testing: DataDog (RUM, synthetic tests, dashboards), SumoLogic, Jest, Cypress

ACHIEVEMENTS & ADDITIONAL EXPERIENCE

Warner Bros. Discovery Flash Forward: AI/ML Hackathon 2025 Winner

- First-place finish (out of 1200+ teams)** for **CNN Verified**, a prototype Chrome extension pairing AI media detection with CNN journalism to authenticate images, video, and audio in real time.

Welcomary | Lead Engineer

June 2022 - July 2024

- Developed core front-end features, established engineering best practices, and mentored junior developers.

EDUCATION & CERTIFICATIONS

[AWS Certified Developer - Associate \(DVA-C02\) | Feb. 2025](#)

George Washington University - B.A., Criminal Justice; Professional Studies Certificate, Full-Stack Development Bootcamp
